

Assignment Task: Playwright 101

Test Scenarios

Test Scenario 1:

1. Open TestMu AI's Selenium Playground from <https://www.testmuai.com/selenium-playground/>
2. Click **"Simple Form Demo"**.
3. Validate that the URL contains **"simple-form-demo"**.
4. Create a variable for a string value, e.g., **"Welcome to TestMu AI"**.
5. Use this variable to enter values in the **"Enter Message"** text box.
6. Click **"Get Checked Value"**.
7. Validate whether the same text message is displayed in the right-hand panel under the **"Your Message:"** section.

Test Scenario 2:

1. Open the <https://www.testmuai.com/selenium-playground/> page and click **“Drag & Drop Sliders”**.
2. Select the slider **“Default value 15”** and drag the bar to make it 95 by validating whether the range value shows 95.

Test Scenario 3:

1. Open the <https://www.testmuai.com/selenium-playground/> page and click **“Input Form Submit”**.
2. Click **“Submit”** without filling in any information in the form.
3. Assert **“Please fill in the fields”** error message.
4. Fill in **Name**, **Email**, and other fields.
5. From the **Country** drop-down, select **“United States”** using the text property.
6. Fill in all fields and click **“Submit”**.
7. Once submitted, validate the success message **“Thanks for contacting us, we will get back to you shortly.”** on the screen.

Execution

You are required to run the above test in parallel on at least 2 different browser/OS combinations on the TestMu AI platform (for example, Windows 10, Chromium and macOS Catalina, Firefox)

Important Notes

1. You can submit the solution using the Playwright framework and any language of your choice. However, it is recommended to use the latest version of the framework.
2. Please ensure to use at least 3 different locators while performing the test.
3. Please ensure that network logs, video recordings, screenshots, and console logs are enabled in all the test runs. Please refer to the [Automation Capabilities Generator](#) for desired capabilities.

Important Instructions

1. Push your project files to the [GitHub repository](#) and submit the Coding Assignment details (GitHub repository URL and TestMu AI Test Session IDs) on the exam portal.
2. Ensure that your GitHub repository is privately shared with admin@testmuaicertifications.com.

3. Ensure that network logs, video recording, screenshots, & console logs are enabled through the [desired capabilities generator](#).
4. Submit the final solution within 36 hours of the deadline.

TestMu AI Account Setup and Trial Access:

1. Sign up on TestMu AI using the same email you used for your certification registration.
2. Your first-time TestMu AI signup includes 100 minutes of automation testing.
3. If your automation minutes are used up or your trial access has expired, you can request an extended trial (24 hours or more).
4. If your trial minutes are exhausted, contact admin@testmuaicertifications.com or support@testmuai.com to extend your trial in order to complete the assignment.
5. You can also refer to our [support docs](#) to get started with automation testing on the TestMu AI platform.
